

Claims to Cash, *Quicker.*[™]

5010/ICD-10 Regulatory Deadlines Underway

Healthcare CFOs/administrators are facing pressures from all sides...

Not only do they have their routine day-to-day pressures of running a hospital, surgery center, physician group, etc., but now they must be ready to meet the 5010/ICD-10 deadlines.

The federal deadline for adopting the HIPAA 5010 financial and administrative transaction sets is **January 1, 2012.**

ICD-10 deadline is **October 1, 2013.**

Claims to Cash, *Quicker.*™

The project is immense...where does one begin? How will this get done in time?

Claims to Cash, *Quicker.*™

It's complex. It's costly. It's the healthcare Y2K!

And, it's federally mandated...the compliance dates are stuck and unavoidable, and not complying is out of the question.

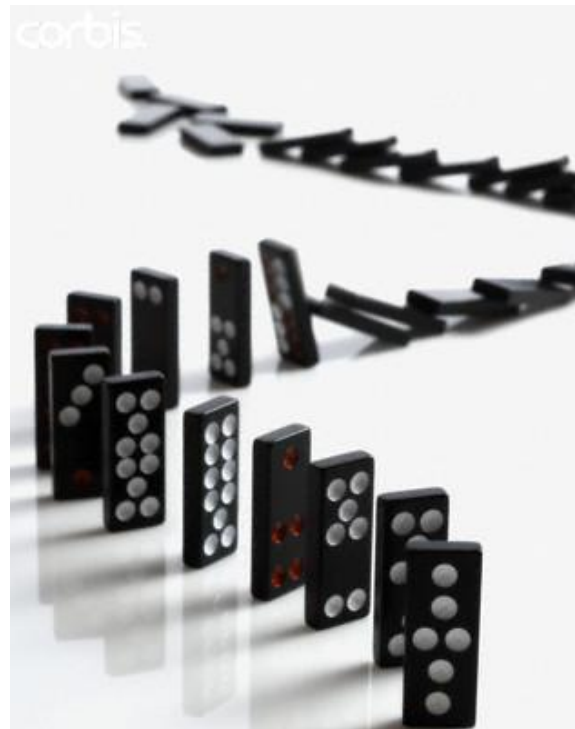

Claims to Cash, *Quicker.*™

It seems like years of work that needs to be completed in a few short months.

And, it must be done right! Mistakes will be risky and costly.

Claims to Cash, *Quicker.*™

It will require significant planning and system modifications or upgrades, along with training and other investments.

Adding to all the requirements is the fact that 5010 capabilities are a must-have to support ICD-10.

Claims to Cash, *Quicker.*™

Transitioning from ICD-9 to ICD-10, HIPAA 4010A1 to HIPAA 5010 — all require tandem processing and must not affect clinical, claim, or payment flow.

Claims to Cash, *Quicker.*™

A decorative graphic consisting of a thick, wavy line that transitions from a light green color on the left to a darker green on the right, with a thin purple line following its lower curve.

By selecting the right technology and the right partner in this transition, the road ahead will be smooth.

GHN is your trusted partner.

We enable health organizations to simplify their solution infrastructure and reduce costs by leveraging our cutting edge technology platform's reporting and data capabilities, partner resources, and best practices.

Plus, our value-add EDI solutions can address other needs in your organization.
